Meet the Possible You

An immersive experience to introduce you to a new way to meet your life's purpose.

As technology accelerates, industries evolve, and definitions of success shift, this is a moment to stop racing and turn your attention inward, to explore what's possible for you, on your own terms.

TOGETHER, WE'LL EXPLORE TWO ESSENTIAL QUESTIONS

01

What's next for me?

02

How do I get there?

BUILT ON QUANTUM YOU'S PROPRIETARY POSSIBLE YOU METHOD

Imagine — Discover — Design — Activate — Live

What got you here may not be what gets you where you want to go next.

LENGTH	FORMAT	STYLE	INVESTMENT
90 minutes	Virtual or in-person	Immersive + breakouts	$2,500

THE EXPERIENCE

A science-backed approach to exploring your *"possible selves."*

A powerful and proven approach that has changed thousands of lives, designed for women navigating change in real time, that goes beyond the panel and the pep talk to real inquiry and immediate results.

THE INTENTION

Every participant accesses a meaningful undiscovered, or previously dismissed, insight about who she is and what she wants.

IN THE ROOM, YOU'LL

01

Uncover patterns

See the themes that keep showing up in your choices, your energy, and your story.

02

Challenge untested assumptions

Question the "shoulds" and limits you've been carrying without examining.

03

Surface unexplored parts of yourself

Reconnect with interests and possibilities you may have set aside.

YOU'LL LEAVE WITH

New self-awareness

A foundation for what comes next.

A possible prototype

One version of who you could become.

A plan to "try it on"

Practical tools to actively design what comes next.

EC

Eileen Crossin

Founder, Quantum Potential + Quantum You

Former C-suite revenue leader at companies like TikTok, who has navigated this inflection herself and co-created the Possible You Method.

BW

Bradley Wright, PhD

Founder, Life Purpose Lab · Advisor, Quantum You

Sociology Professor with a decade of experience researching and teaching proven methods for discovering life purpose.
